

WHAT HAS LOVE GOT TO DO WITH IT?

Chapter from MAN POWER GOD POWER

Inspired by the Ascended Masters

Love is one of the most used words and supposedly experienced emotions in human existence. Do we really know or understand what love is? Do we know the true purpose of love? What is the understanding of love beyond what we think we feel or have experienced? Through the connection and support of higher realms beyond humanity let us see if we can gain a new insight and truth about this thing called love...

The energy/vibration that is love is the manifesting power within creation, the building block, the power behind and within ALL THERE IS. It is almost impossible for the human mind to comprehend this thing called true love or to know exactly what it means. The human experience of love is a mere reflection/shadow of the true essence of love. The mystery of love is an essential part of its power and glory. True love is the attraction of the magnification of the eternal divine wisdom and God Power of Creator/Source or whatever you chose to call the most loving and powerful force in the many universes. Since we are all unique, perhaps our definition and experience of the most extraordinary force in the universe is meant to be unique to each one. True love always understands, yet not necessarily is always understood nor needs to be.

But let's see what we can piece together about love. The ascended masters who once were human and walked our Earth and experienced love in a similar fashion as we human mortals may give us some clues. Their Law of Oneness and Unity seems to be an offspring of love. "Love one another as you love yourself," is the blueprint of knowing who we are and why we are here. We appear to learn "what is" through "what is not," most often.

The separations of alpha and omega, light and dark, masculine and feminine, right and wrong can only become one, whole and healed by healing our illusions through love of self and others.

Love is composed of itself, wisdom and power in order to create the Oneness. But its wholeness can never be divided by its parts. For the foundation of reality is WE ARE ONE. Humanity has

chosen to experience the separate parts of oneness and divide them but that has never been truth. This is our not-so-simple way we have chosen to learn what we need to learn. The separating is now coming back together in oneness...duality is in the process of ending.

Love is accepting through understanding (compassion) that allows forgiveness, which frees the one forgiving. We need forgiveness since humanity has the capacity to be other than love. This capacity is the reason for human life's drama (the divine can never be so). Divine love unlike human love is not giving to get, but simply giving with no expectation. The substance of divine love is the power within creation, as well as the sustenance of such creation. Without faith and trust that love actually exists it is impossible for us to know that it exists. At present, human love is an aspect of divine love not the whole yet...but we are working on it...

The quest for the true meaning of love is often found with so-called metaphysicians and spiritual seekers. They hunger for mastery of self and the universe, while not satisfying the "grand requirement" to honor before all else a meaningful and committed love toward God that created them, and self and others (selfish love is not self-love). True self-love is the foundation of all other relationships. You cannot love another without loving you first. This has kept humanity in separation and duality, and has been the downfall of all past Golden Ages. The applied requirement is the pathway to the final Golden Age. True Love is the God Power of the universe.

There are many types of feelings and emotions, which we call love but in truth are not. Love is neither an emotion nor a feeling but an action of God Power manifesting. Love is penetrating and forever expansive and growing and enfolding and transforming, and transmuting. Love is all the Beingness of God combined with many mysteries that humanity is not ready to neither understand nor receive. Love is the engrained ingredient of life.

True love is changeless and always. It is the one element in the universe into which all others meet. Love is the highest expression of you and God in and beyond time and distance. True love is a natural expression of you and God Power, while most human love is an aspect of truth aspiring to be true. True love is filled with an "attitude of gratitude" that becomes a magnet for

love radiating out all around you. True love is God Power beating your heart and being manifestation at the same time.

One day soon our scientist will develop “love instruments” that will be able to measure the love energies that radiate out, but they will never be able to measure the all-encompassing God Power of true divine love. Only you and God can do that as Man Power becomes God Power...

There is no limit to the multitude of true love and soon you will use its God Power to discover and love new ways of being and discover worlds you cannot imagine now...
